How PLM Delivers on a More Agile Business Mindset

By Derek Neiding, Vice President, Razorleaf

How PLM Delivers on a More Agile Business Mindset by Derek Neiding

Derek shares how the effective use of PLM requires a business mindset to realize the most gains from technology. It is not just an IT project.

He explains how PLM can help organizations establish a digital backbone for innovating new categories of products, including those that drive service-based revenue models.

Smart Investments Can Accelerate Your Smart Factory Transformation

Business agility is becoming a necessity for product manufacturers, the challenge is how to transform your organization. A recent article from Gartner, "Smart Factories Require Smart Investments – A Different Way to Invest in Transformation," explains the investments and readiness needed to get new products to market.

Smart Investments Can Accelerate Your Smart Factory Transformation

Partnerships Fuel Innovations

Jen Ferello shares her thoughts on how the right partnerships can be an effective way for companies to drive innovation, reduce costs, and expand into new markets. With the right partners, companies can achieve more than they ever could alone.

Why You Should Be Improving Employee Engagement

Recent studies by Gallup explain the current state of employee engagement which was in a decline but took a dive in 2020 with COVID. Employers need to take steps to understand their employees' state of mind to ensure long term retention, employee development and satisfaction.
