[Razorleaf Expands with New Office in India](#)

Razorleaf is excited to announce the opening of Razorleaf Pvt. Ltd., located in Pune, India to support customers across Europe and North America as part of its 2022 global growth strategy to expand our talent pool, maintain high level of quality, and control costs for our clients.

[READ MORE](#)

[Razorleaf Announces CLOVER CollectIT Release 2.0](#)

Razorleaf announces CLOVER CollectIT Release 2.0, which allows non-PLM users to view the full BOM hierarchy, related CAD files, ECOs, technical documentation, and the latest product engineering data from the New Item Viewer.

[READ MORE](#)

[Webinar: Simplify Your Product Sharing Process with CollectIT](#)

Register for a live demonstration of CLOVER CollectIT on Aras Innovator. Learn how product engineering teams can spend less time searching for data for non-PLM users to improve collaboration and decision-making across the extended enterprise.

[READ MORE](#)

On Demand: Validate Your PLM Configurations with Egplant Test Software

Watch the On Demand demonstration of Keysight's Egplant Software, a leading test automation platform, on Dassault Systèmes' 3DEXPERIENCE ENOVIA and Aras Innovator platforms. Learn how testing software helps monitor, identify, and prevent PLM implementation issues.

[Tech Tuesday – Webinar Series for the Aras Community](#)

Watch On Demand our exclusive webinars on What's New in Aras' Releases. Get inside knowledge on Aras' direction - giving you an edge in your PLM journey. We share and demonstrate exciting updates, features, and applications on Aras Innovator releases.

[READ MORE](#)

[Digital Engineering: Special Industry Focus – Digital Twins](#)

Read Digital Engineering's Special Industry Focus issue on how digital twins, Internet of Things (IoT), and Industry 4.0 technologies impact product design processes and manufacturing. Jonathan Scott, our chief architect, provides insights into these technologies.

[READ MORE](#)

[How to Not Write Custom Code for DriveWorks](#)

Learn how to optimize the power of the DriveWorks

SDK by focusing on the development of new functionality rather than the development of custom code for a more scalable, reusable, maintainable implementation.

Summary of Dassault’s MBSE Cyber Experience Symposium

Read the Summary of Dassault Systèmes’ MBSE Cyber Experience Symposium. Multiple sessions centered on the architecture modeling capabilities of CATIA Magic System of Systems Architect, but most sessions covered two main topics: Systems Modeling, using SysML, and Systems Simulation, via intrinsic CATIA Magic tools.
